TRI & La Une

BULLETIN OFFICIEL DE LA FÉDÉRATION FRANÇAISE DE TRIATHLON

OCTOBRE 2008

Vous trouverez ci-dessous un communiqué de l'ITU sanctionnant par une suspension de 2 ans Dmitriy GAAG (Kaz) suite à un contrôle positif à l'EPO lors de l'étape de Coupe du Monde de Des Moines (USA) qui s'est déroulée le 20 juin 2008. Cette sanction prend effet à compter du 20 juin 2008.

September 5, 2008

“To all athletes, coaches and National Federations,

ITU has imposed a two-year ban on Dmitriy Gaag (KAZ) after committing an anti-doping rule violation in an out-of-competition doping control test in Des Moines, United States on June 20, 2008. ITU will issue a formal press release shortly but wanted to inform all National Federations, athletes, coaches and staff first.

The ban begins June 20, 2008 and prohibits Gaag from entering or participating in any competition or activity authorized by ITU, its National Federations (NFs) and/or any other signatory to the World Anti-Doping Code.

Gaag's anti-doping rule violation was a result of an adverse analytical finding of recombinant erythropoietin (EPO), a substance on the World Anti-Doping Agency (WADA) Prohibited List.

Following the notification of the adverse analytical finding of his «A» sample, Gaag exercised his right under the ITU Anti-Doping Rules to have the «B» sample opened. With the Olympic Games imminent, ITU opted to provisionally suspend Gaag, thereby forcing his removal from the men's triathlon competition start list.

The «B» sample was opened and analyzed using the ISO accredited methods. On August 19, the analytical result confirmed the «A» sample and presence of recombinant erythropoietin (EPO) in the urine. In accordance with the World Anti-Doping Code, ITU imposed the 2-year ban on Gaag after he waived his right to a hearing.

ITU's policy, in accordance with WADA's code, is to not issue any proactive formal statement until these situations reach its conclusion.

All of Gaag's results from June 20 to present will be removed. His prize money from the Tiszaujvaros BG Triathlon World Cup was blocked and ITU administrative staff is currently contacting all affected athletes to make necessary prize money upgrades and adjustments.

ITU is strongly committed to maintaining the integrity of the sport by ensuring athletes are competing on a level-playing field by abiding to the World Anti-Doping Agency (WADA) Code to help keep triathlon clean. The ITU Anti-Doping Rules are written in compliance with the WADA Code. For a National Federation (NF) to be affiliated with ITU, it must abide by the WADA Code and ITU Rules.”
